Conference overview

Numerous challenges are faced daily by health care professionals working in the field of trauma. This conference is designed to offer an overview of the advances recently being made in trauma care. It will provide attendees with new enthusiasm for best practices and useful approaches in managing trauma, which ultimately will allow patients to experience healthier lives. Selected topics will focus on prehospital care, updates in trauma surgery, and disaster response.

An opportunity to practice intraosseous line placement in a cadaver lab will be available to interested attendees. The small-group lab sessions will run concurrently with the lectures. Please be sure to indicate when registering if you are interested in attending the lab.

Please note: Allegheny General Hospital does not certify the competency of any individual participating in the intraosseous line placement cadaver lab workshop. This workshop is not certified for AMA PRA Category 1 Credit™

Intended Audience:
The intended audience is physicians, nurses, prehospital care providers and others interested in trauma care.

Acknowledgment:
Special thanks to EZ IO® and the staff of Arrow/Teleflex for providing the cadaver lab workshop and training.
