Course Description
This symposium focuses on high yield Prosthetics & Orthotics (P & O) material relevant for the Physical Medicine and Rehabilitation Board exam. This is a scientific, educational program with intense focus on prosthetics, orthotics and assistive technology taught by a team of highly experienced and certified healthcare professionals.

Target Audience
This symposium is intended for physicians, fellows and residents, medical students and P&O students in Physical Medicine, Rehabilitation and Occupational Medicine.

Learning Objectives
Course Objectives:
At the completion of this 2-day symposium the attendee should be able to:
- Demonstrate understanding of levels of amputation and different types of lower extremity prosthetic components
- Understand normal gait and prosthetic/orthotic induced gait deviations
- Understand the prosthetics “process”: from pre-amputation and surgery to post-op and pre-prosthetic programs, prosthetic prescription/fabrication and training
- Identify prosthetic components and understand how applied to patient care
- Identify the key elements of a prosthetic prescription
- Understand the rehabilitation process and interdisciplinary actions needed for high quality patient outcomes and value in care
- Understand the fundamentals of orthotic devices, indications and contraindications
- Demonstrate understanding of prosthetic/orthotic devices interaction with gait and troubleshooting
- Understand the fundamentals of seating and wheelchair recommendations, prescriptions and patient use
