PURPOSE AND OBJECTIVES
Urology is a constantly evolving field that requires the consistent review of diagnostic and treatment strategies. Specifically, the areas of prostate cancer, pediatric urology, urinary tract reconstruction, urolithiasis, socioeconomics of medicine, and office urology include subjects with recent emerging information and strategies for managing those urologic conditions. Urologic providers need up-to-date reviews of these topics that affect the care of their patients.

CORE COMPETENCIES: PATIENT CARE AND MEDICAL KNOWLEDGE
This course contributes to the American Board of Urology Maintenance of Certification requirements of 90 hours of CME.

EDUCATIONAL OBJECTIVES
After attending this meeting participants should be able to:

- Discuss the appropriate use of testosterone replacement therapy in patients with a history of prostate cancer
- Describe urine tests for prostate cancer that are approved by the FDA or under development that may address pitfalls of PSA screening and improve prostate cancer early detection
- Review the new agents that have been recently developed for the treatment of castrate resistant prostate cancer
- Discuss the appropriate use of novel intravesical therapies for patients with refractory superficial bladder cancer
- Explain the office work up and management of the infertile male patient
- Discuss the new trends in the management of pediatric vesicoureteral reflux and varicocele
- Review the diagnosis and treatment of complex male urethral stricture disease
- Explain the expanding role of mid-level providers in your urology practice
