Course Description
The Emory Practical Intervention Course (EPIC) has been an annual event since 1981, providing training for thousands of the most active interventional cardiologists in this country. A major change will occur this year as EPIC becomes the Emory Practical Intervention Course-Southeast Consortium (EPIC-SEC). Twelve academic centers will actively participate in EPIC-SEC 2015 which is a cutting-edge update of the newest strategies in coronary, structural heart, and peripheral vascular intervention and surgery.

Cardiovascular practice has never evolved more rapidly than today. Arteries, valves, veins, infarcting and hypertrophied myocardium and other anatomic sites are targets for intervention and symptom relief in a vast array of cardiovascular pathology including STEMI, unstable angina/non-STEMI, aortic stenosis, mitral regurgitation, acute stroke, chronic valvular and perivalvular defects, and many other conditions including adult congenital heart disease. This course will feature the cumulative wisdom of 12 academic centers featuring live case demonstrations, presentations and discussions of complex cases, debates between well-known interventionalists and surgeons and the opportunity for insightful audience participation and discussion. The national concern regarding appropriate selection for diagnostic studies and intervention will be addressed in detail.

This course is designed for interventional cardiologists, radiologists, cardiac nurses, nurse practitioners and physician assistants, cardiac and vascular surgeons, interventional radiologists and other healthcare professionals interested in the optimal practice of interventional cardiovascular medicine.

Learning Objectives
After completing this course, participants should be better able to:

- Identify new approaches to the optimal selection for and performance of coronary, structural heart, and peripheral intervention and surgery;
- Compare innovative new strategies for prevention of restenosis including drug-eluting stents and balloons and to understand factors contributing to the development of stent thrombosis and strategies to prevent it;
- Define optimal anti-platelet and anti-thrombin therapy to reduce early and late bleeding and adverse cardiac events;
- Describe techniques, outcomes, and complications of coronary, carotid and peripheral artery angiography and stenting including radiation exposure of patients, physicians and cath lab staff;
- Explain indicators for percutaneous valve repair and replacement and alcohol septal ablation and acute stroke intervention;
- Optimize therapy in patients with acute coronary syndromes and vasospastic angina and to better understand appropriateness criteria for intervention.

Credits
The Emory University School of Medicine designates this live activity for a maximum of 20AMA PRA Category 1 Credits ™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. The Emory University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

This program is designed to give physicians and allied healthcare professionals new knowledge in interventional cardiovascular medicine. It is also designed to improve physician performance to better provide patient care.

Maintenance of Certification (MOC)
For information on the maintenance of certification (MOC) requirements for time-limited certificates, please consult with the appropriate certifying board with the American Board of Medical Specialties, www.abms.org

Special Events
Welcome Reception – Thursday, April 30, 6:00 p.m. – The Garden Area, Emory Conference Center Hotel
Special Reception and Buffet Dinner – Friday, May 1, 7:00 p.m. – East Lake Golf & Country Club, 2575 Alston Drive, SE, Atlanta, GA 30317, transportation provided from the Emory Conference Center Hotel beginning at 6:30pm.

Conference Location and Lodging
The sessions will be held at the Emory Conference Center Hotel, 1615 Clifton Road, adjacent to the Emory University Campus in Atlanta, Georgia. Parking is $20.00/day. A block of rooms is available at the Emory Conference Center Hotel at a special group rate of $159 per night, single or double occupancy (plus tax). To reserve accommodations and receive the group rate, call (404) 712-6565 or call (800) 933-6679. When making your reservation, indicate that you are making reservations in the EPIC – Emory Practical Intervention Course room block. Reservations should be made as soon as possible. Our block expires April 8, 2015. Reservations made after this date will be based upon space and rate availability.

Tuition
The tuition charge includes continental breakfasts, luncheons, refreshment breaks, course syllabus, and other amenities involved in making this a rewarding learning experience. Minimum and maximum enrollments have been established, so register early. Written cancellations on or prior to April 15, 2015 will be refunded less a $50 administrative fee. No refunds will be given after April 15, 2015.

Emory University reserves the right to cancel the program and return all fees. The liability of Emory University School of Medicine is limited to the course fee. Emory will not be responsible for any losses incurred by registrants, including, but not limited to, airline cancellation charges or hotel deposits.
