10th ANNUAL CARDIOLOGY UPDATE: THE HEART OF NEW DEVELOPMENTS

CONFERENCE OVERVIEW

This educational activity is designed to present state-of-the-art knowledge in cardiovascular disease. An overview of current and new modalities of ischemic heart disease, heart failure, arrhythmias, valvular heart disease, pulmonary hypertension, hypertension, hyperlipidemia, and diabetes, will be discussed. Additionally, this program will review the regulatory environment in cardiology.

DESIGNED FOR

This course is intended for practicing Cardiologists, Cardiac Surgeons, Cardiovascular Trainees, Family Practice/Internal Medicine Physicians, Hospitalists, Physician Assistants, Cardiology Technologists, Nurse Practitioners and Registered Nurses with a cardiovascular interest.

COURSE OBJECTIVES

- Describe the role of a cardiologist in the management of patients with Pulmonary HTN
- Review the current management of PVCs and ventricular tachycardia and the indication for catheter ablation
- Review the current management of atrial fibrillation- Ablation and other evolving therapies
- Identify anticoagulation issues in patients with coronary artery disease (CAD)
- Discuss new non-invasive hemodynamic assessments of CAD
- Describe current management of patients with acute coronary syndrome
- Discuss the current evaluation and treatment of patients with aortic and mitral valve disease
- Review the contemporary management of patients with heart failure
- Describe the new diabetes treatment and the cardiovascular implications and indications
- Review the role of cardiac imaging in heart failure, sudden death, and ischemic heart disease
- Discuss new therapies for cardiac amyloidosis
- Know when to intervene on your patients with hypertrophic cardiomyopathy
- Discuss the controversies in management of hypertension and dyslipidemia
