OVERVIEW
The 5th Annual Pediatric Endocrinology Symposium 2015 will provide a broad spectrum of interesting and challenging topics on growth hormone. The most current research findings and practice strategies will be presented by an international faculty who are experts in the field. This year, the content will focus on improving learner knowledge of new growth hormone therapies, the causes for suboptimal outcomes related to care of patients with congenital hypothyroidism and hypothalamic obesity, as well as discussion of the safety, efficacy and failure of growth hormone. A special session this year is focused on Prader Willi Syndrome. The learning formats will include didactic lectures, case presentations and interactive discussion.

LEARNING OBJECTIVES
At the end of this course, the learners should be able to:
• Discuss the most recent research findings and advances in the evaluation and treatment of patients with growth hormone abnormalities
• Assess and treat congenital hypothyroidism
• Describe the safety and efficacy of growth hormone therapy
• Select when to use long acting growth hormone therapy
• Assess and treat hypothalamic obesity
• Review new therapies to treat Prader Willi Syndrome
TARGET AUDIENCE
Pediatric and adult endocrinologists, internists, geneticists, nurse practitioners, nurses, residents and fellows.
