Cardiology in PRIMARY CARE
October 18-20, 2018
Atlanta Marriott Buckhead Hotel
and Conference Center
Atlanta, Georgia

www.CPC.emory.edu

STATEMENT OF NEED
With the restructuring of health care in the United States, one of the major changes in patient care has been a shift from subspecialty care to primary care. In addition, cardiovascular disease remains the leading cause of death and disability in the U.S. As a result, much of the burden of caring for patients with cardiovascular disease will fall on primary care physicians. This conference is designed to provide an update in the diagnosis and management of cardiovascular disease for primary care providers.

At the Emory Cardiology in Primary Care Conference, you will hear from nationally renowned speakers on a wide variety of topics. A few areas of focus will include CHF, CAD, arrhythmias, PVD and more. Additional focus will be given to ECG skills. Didactic lectures and panel discussions with the experts will also highlight key concepts in cardiovascular disease.

Core Competencies: Patient Care & Medical Knowledge

COURSE OBJECTIVES
After attending this meeting, participants should be able to:

- Demonstrate recent advances in cardiovascular medicine
- Utilize the electrocardiogram to better diagnose cardiovascular disease
- Recognize specific challenges in caring for patients with cardiovascular disease
- Utilize guidelines for lipid-lowering therapy
- Identify new therapies for managing hypertension
- Give examples of the treatment and evaluation of the aortic and mitral valve
- Identify the optimal strategy for screening for peripheral vascular disease
- Discuss choosing the correct stress test for your patient
- Identify optimal strategies for the management of prosthetic valves and endocarditis
