COURSE DESCRIPTION

The symposium will have expert review and updates on the latest procedures, technology and medical treatments for GI cancer patients. Indications and therapeutic advantages of proton radiotherapy will be discussed. Additionally, there will be case-based discussions incorporating multi-disciplinary care approaches, novel, recently FDA-approved drugs, and clinical trial eligibility.

Attendees will gain insight into novel and different treatment modalities available for their patients with GI cancers allowing them to formulate a tailored treatment plan.

TARGET AUDIENCE

This symposium is intended for physicians, advanced practice providers, pharmacists and oncology nurses. Trainees, at all levels, are highly encouraged to attend.

LEARNING OBJECTIVES

Upon completion of this education activity, learners should be able to:

- Recognize the multi-disciplinary approach (surgical oncology, medical and radiation oncology, and interventional radiology) to treating GI cancers;
- Identify and use the new oncologic therapeutics for GI cancers and know ongoing clinical trials;
- Incorporate multi-disciplinary approach towards patient care and offer an increased number of treatment options for patients;

CONTINUING EDUCATION CREDIT

The Emory University School of Medicine designates this live activity for a maximum of 5.0 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Successful completion of this CME activity, which includes participation in the evaluation component, enables the participant to earn up to 5.0 MOC points in the American Board of Internal Medicine’s (ABIM) Maintenance of Certification (MOC) program. It is the CME activity provider's responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.

The Emory University School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.
