LEARNING OBJECTIVES

- Evaluate and manage clots in the splanchnic and cerebral veins.
- Analyze the clinical characteristics and pathophysiology of PNH.
- · Explain new and current new treatments for PNH.
- Compare the benefits of intravenous iron to oral iron in most causes of iron deficiency.
- Determine which formulations of intravenous iron should and should not be used in outpatients.
- Apply clinical and laboratory tools to identify patients with likely aHUS who will benefit from early terminal complement blockade.
- Analyze the uses, benefits and risks of complement inhibitory therapies in thrombotic microangiopathies.
- Design individualize first-line treatment for newly diagnosed patients.
- Develop a monitoring plan to manage both optimal and suboptimal TKI responses.
- Incorporate opportunities for treatment-free remissions for patients.
- Recognize the uses, benefits and risks of complement inhibitory therapies in thrombotic microangiopathies.
