About the Course

This course is designed to introduce providers to the fundamentals of diet and nutrition for primary care. Attendees will learn about eating well in health as well as the evidence behind certain diets in chronic disease. Topics will include eating well for diabetes, heart disease, and inflammatory conditions. Attendees will also learn holistic strategies to promote healthier eating in their patients. Course content will be clinically oriented, informal, and interactive, and will include case presentations, patient stories, and practical demonstrations.

Target Audience

Primary Care physicians, advanced practice nurses, physician assistants, and members of the health care team who seek to advance their knowledge in this area.

Course Objectives

At the end of the conference, attendees will be able to:

- Recommend an evidence-based diet.
- Help diabetic patients develop a healthy eating plan that promotes better glycemic control.
- Discuss heart-healthy eating as an important way to lower risk of heart disease and stroke.
- Demonstrate practical and realistic methods of healthy cold food preparation.
- Discuss the evidence regarding the anti-inflammatory diet which often includes excluding gluten, dairy, refined sugar, and night-shade vegetables.
- Cite practical information regarding talking with patients about nutrition and healthy eating.
- Explore the relationship between body image dissatisfaction and eating patterns.
- Explain the importance of medication monitoring and adjustment for patients who make dietary changes.
- Demonstrate nutritional life hacks for everyday healthy eating.

Agenda

a.m.

8:00 – 8:15  Introductions – Avantika Waring, MD and Rachael Wyman, MD
8:15 – 9:15  Evidence-based Nutrition Primer
- Brandon Hidaka, MD, PhD
9:15 – 10:15 Eating for Diabetes – Avantika Waring, MD
10:15 – 10:30 Break
10:30 – 11:30 Eating for Heart Health
- Rachael Wyman, MD
