This course offers a review of important and timely topics in the field of perinatal medicine. Based on a review of the literature, input from our own expert faculty, and analyses from past conferences, we are proud to offer a comprehensive program with topics that include: Hypertensive disorders during pregnancy; preterm labor; noninvasive prenatal testing; electronic fetal heart rate monitoring; pregnancy at the extremes of reproductive age; and a host of other topics. Lectures by USC faculty from the Keck School of Medicine and distinguished guest faculty from University of Utah and the University of Arizona will outline controversies, discuss recent developments, and suggest recommendations. Participants have direct access to the speakers and ample opportunity for intensive question and answer post-lecture discussions.

TARGET AUDIENCE
The program was developed for gynecologists, obstetricians, perinatolgists, neonatolgists, nurses, nurse midwives and other allied health professionals. It is USC’s mission that this educational opportunity provide participants with objective, evidence-based clinical content, to incorporate into their practices and improve the clinical care and further the well-being of their patients.

COURSE OBJECTIVES
By the end of the course, participants will be able to:
• Assess current literature regarding the role of progesterone in preterm labor.
• Formulate a practical plan to screen for and manage diabetic ketoacidosis in pregnancy.
• Describe and incorporate a treatment plan for intestinal disorders and cardiac disease in pregnancy.
• Apply practical tips to thoroughly assess and manage hypertension in pregnancy.
• Describe a practical approach to diagnosis and management of nausea and vomiting in pregnancy.
• Assess the controversies surrounding noninvasive prenatal testing.
• Implement a plan to manage breast malignancy during pregnancy.
• Construct a practical algorithm for the management of disseminated intravascular coagulation in pregnancy.
• Apply a standardized approach to fetal heart rate monitoring terminology, interpretation and management.
• Describe the risks and treatment strategies for multiple gestations.
• Understand the strategies to ignite passion as a healthcare provider.
• Understand the use and contraindications for low dose aspirin during pregnancy.

ACCREDITATION STATEMENT
The Keck School of Medicine of the University of Southern California is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.
