Program Goals
The Mount Sinai Inflammatory Bowel Disease Consultant’s Course will provide an in-depth review of state-of-the-art diagnostic methods, medical and surgical therapeutic approaches, and cancer screening and prevention strategies in IBD. Course faculty will lend their expertise to each of the areas that will be highlighted at the symposium. Audience interaction and participation is strongly encouraged and there will be many opportunities for case discussions which have been a highlight of prior courses.

Program Objectives
At the conclusion of the conference, participants will be able to:
- Describe recent innovations in biologic therapies and how to optimize their use in treatment of IBD.
- Identify evidence-based endoscopic approaches, including colonoscopy surveillance, therapeutics, and how to appropriately and optimally apply them to clinical practice.
- Analyze controversial issues in the multidisciplinary management of IBD with consideration for the special patient populations and identify the risks and benefits of treatment options.

Who Should Attend
Gastroenterologists, Colorectal Surgeons, Primary Care Physicians, PAs and other healthcare professionals caring for patients with IBD or colorectal cancer.
