PROGRAM DESCRIPTION
In light of recent advances in the care of youth with diabetes, abnormal pubertal development and growth disorders, the Mount Sinai Division of Pediatric Endocrinology and Diabetes seeks to empower a broad array of clinicians to provide the highest level of care to people with diabetes, concerns for abnormal pubertal development and growth disorders. Participants will learn about pathophysiology, treatment goals and treatment methods for diabetes, abnormal pubertal development, and growth disorders, and will emerge more confident dealing with diabetes and endocrine challenges.

TARGET AUDIENCE
Pediatricians, family practitioners, scientists, nurse practitioners, physician assistants, diabetes educators, nutritionist, dieticians, social workers, residents, students and others involved in the care of young people with diabetes, pubertal and growth disorders.

GOALS AND OBJECTIVES
At the conclusion of the conference, the participants will be able to:

• Identify the underlying etiologies of growth disorders and understand a systematic approach to genetic testing in patients.

• Recognize clinical evidence based advances and challenges in the treatment of Type 1 Diabetes Mellitus.

• Recognize key factors involved in normal pubertal development and understand the systematic approach to evaluation and treatment of patients with abnormal pubertal development.
