CME INFORMATION

Target Audience
Comprehensive ophthalmologists, cornea and cataract surgery specialists, glaucoma specialists, neuro-ophthalmologists, retina specialists, uveitis specialists, and ophthalmology fellows and residents.

Activity Description
This educational activity is designed to update and inform participants regarding the emerging information related to new surgical techniques in glaucoma surgery, including MIGS (minimally invasive glaucoma surgery), neovascular glaucoma, cataract surgery, aqueous shunt surgery, and surgery in the patient with ocular inflammation. An examination of the latest AMD therapeutics and current stem cell studies, as well as diabetic retinopathy and optical coherence tomography angiography will be covered.

Educational Objectives
Upon completion of this activity the learner should have improved his/her ability to:

- Describe the impact of ocular surface disease on cataract surgery outcomes and glaucoma management.
- Discuss the latest therapeutics and research findings for the treatment of glaucoma.
- Describe the latest strategies available for the management and treatment of glaucoma.
- Discuss the benefits and pitfalls in the use of OCT when evaluating ophthalmology patients.

Accreditation Statement
The New York Eye and Ear Infirmary of Mount Sinai is accredited by the ACCME to provide continuing medical education for physicians.
