Course Description
This educational activity will involve in-depth discussions on all aspects of perforator flaps including basic research, anatomy, physiology, and surgical technique. Live surgery, in three simultaneous operating rooms over two days, will be a highlight for all participants.

Target Audience
Plastic Surgeons, Microsurgeons, Residents and Fellows

Statement of Need
There is a gap between the actual and potential frequency of perforator flap surgery. It is underutilized in clinical practice. This is the result of a lack of adequate training in this technique among many clinicians who do reconstructive surgery.

Educational Objectives
At the conclusion of this activity, participants should be able to:
- Develop strategies to increase the frequency of perforator flap techniques in practice to reduce recovery time and surgical complications.

Course Description
This educational activity will involve in-depth discussions on all aspects of perforator flaps including basic research, anatomy, physiology, and surgical technique. Live surgery, in three simultaneous operating rooms over two days, will be a highlight for all participants.

Target Audience
Plastic Surgeons, Microsurgeons, Residents and Fellows

Statement of Need
There is a gap between the actual and potential frequency of perforator flap surgery. It is underutilized in clinical practice. This is the result of a lack of adequate training in this technique among many clinicians who do reconstructive surgery.

Educational Objectives
At the conclusion of this activity, participants should be able to:

- Develop strategies to increase the frequency of perforator flap techniques in practice to reduce recovery time and surgical complications.
