The 11th Annual Fort Worth Critical Care Conference is an interprofessional activity. The conference is designed for critical care medicine, emergency medicine, general surgery, geriatrics, hospitalists, internal medicine, nephrology, palliative care medicine, pulmonology and trauma surgery, as well as medical residents, advanced practice providers, nurses, pharmacists, dieticians and respiratory therapists.

Upon completion of this educational activity, participants should be able to:

**Targeted Temperature Management Updates**
- Review the evolution of the science supporting the use of targeted temperature management (TTM)
- Debate 33 versus 36 degrees as a target temperature
- Discuss the interdependence between the multi-dimensional, team approach to patient management during and after cooling
- Explain the team approach to discussions regarding neurologic prognostication

**Management of the Pregnant Patient in the Critical Care Setting**
- Recognize physiologic changes of pregnancy
- Review pregnancy-specific considerations to advanced cardiac life support
- Attain a basic comprehension of teratogens
- Discuss imaging safety in pregnancy
- Define appropriate management of obstetrical hemorrhage
- Attain basic knowledge of common obstetrical critical scenarios (e.g., DKA, trauma, hypertensive emergency)
- Recognize the role of the maternal-fetal medicine provider in the critical care patient

**A New Kind of Heroism**
- Recognize the discrepancy between a doctor’s prognostication and what families hear and understand
- Develop the practice and skills for communicating bad news
- Define prolonged mechanical ventilation related to chronic and critical illness

**Life after the ICU: Post-Intensive Care Syndrome**
- Describe the purpose of the post-ICU discharge clinic
- Discuss the average needs and disabilities of patients in the clinic
- Discuss how the clinical team works together to improve patient care
- Describe post-intensive care syndrome and explain the expected patient outcomes within the discharge clinic

**Delerium in the Neurosurgical Patient**
- Define the definition of delirium in the neurosurgical patient
- Recognize the factors leading to delirium in the neurosurgical patient
- Determine the ways to prevent and correct delirium in the neurosurgical patient

**Compassionate Care to Maximize Organ Donation**
- Describe the presumptive approach on all registered donors
- Discuss the role of the interprofessional team in organ donation
- Identify the ethical issues that arise in organ donation approach
