21st Annual Advances in Urology
April 6th - 9th 2011
Casa Marina, Key West, Florida
Course Description

One of the greatest challenges for the practicing urologist is staying abreast of the latest advances in the field. This course is designed for practicing urologists who are interested in updating their knowledge in the diagnosis, evaluation and management of urologic problems. A distinguished faculty will present advances in the management of urological disease including sexual function, uro-oncology, laparoendoscopic single-site surgery, robotic and reconstruction surgery with a strong emphasis on the technical aspects of various urological procedures. There will be ample time for questions and answers.

Objectives

Upon completion of this program, participants should be able to:

- **Recognize** clinical presentation and treatment options of various urologic abnormalities.
- **Properly screen** patients to determine the best surgical option that will result in the best patient outcome.
- **Determine** the latest methodology in the diagnosis and treatment of sexual dysfunction.
- **Recognize** the advantages of robotic-assisted surgery in the management of urologic cancers.
- **Integrate** into clinical practice advances in the management of prostate, bladder, and kidney cancer.
- **Identify** appropriate patients with advanced renal cell carcinoma for treatment with targeted therapies.
- **Analyze** advances in minimally invasive treatment of prostate cancer in order to optimize outcomes for treatment.
- **Incorporate** quality of life considerations in the treatment decision making process for prostate cancer patients.

Target Audience

Urologists, Urology Nurses, Nurse Practitioners and Physician Assistants
