ACCREDITATION:

PHYSICIANS: USF Health is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. USF Health designates this live activity for a maximum of 11.5 AMA PRA Category 1 Credits™. Physicians should claim only credit commensurate with the extent of their participation in the activity.

NURSES: USF Health is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation. A maximum of 11.5 contact hours may be earned by learners who successfully complete this continuing nursing educational activity. There are no pre-requisites for nurses to participate in this activity. To complete this course, nurses must sign in each day, participate in all activities and complete the course evaluation.

FACULTY DISCLOSURE:

USF Health adheres to the ACCME Standards regarding commercial support of continuing medical education. It is the policy of USF Health that the faculty and planning committee disclose real or apparent conflicts of interest related to the content of this educational activity, that relevant conflicts are resolved, and also that speakers will disclose any unlabeled/unapproved use of drug(s) or device(s) during their presentation. Detailed disclosure will be made at the conference and in the conference materials.

The information provided at this CME/CE activity is for continuing education purposes only and is not meant to substitute for the independent medical/clinical judgment of a healthcare provider relative to diagnostic and treatment options of a specific patient’s medical condition.
PHYSICIAN LEARNING OBJECTIVES:
1. Demonstrate essential teamwork principles for optimal management of obstetrical emergencies: Shoulder dystocia, postpartum hemorrhage, eclamptic emergencies, and maternal code.
2. Apply evidence-based, best practice guidelines for the use of forces and vacuum assistance in performing a vaginal delivery.
3. Perform the technical maneuvers associated with a vaginal birth.
4. List the indications for and demonstrate the correct placement of a Bakri balloon and uterine compression sutures.
5. Using role-playing scenarios, demonstrate delivering bad news to a patient and her family.
6. Explicitly role playing scenarios, demonstrate the provision of high-risk patient care.
7. Perform the correct sequence of maneuvers during a shoulder dystocia delivery.

NURSING LEARNING OBJECTIVES:
At the conclusion of the course, nurses will be able to:
1. Demonstrate essential teamwork principles for optimal management of obstetrical emergencies: Shoulder dystocia, postpartum hemorrhage, eclamptic emergencies, and maternal code.
2. Advocate for and declare an emergency without delay.
3. Demonstrate responsibility and initiative in the execution of nursing practice.
4. Demonstrate crisis management skills, including situational awareness, problem-solving and decision-making in critical situations.
5. Identify all available resources needed in the provision of high-risk patient care.
6. Diagnose and demonstrate the correct techniques necessary to repair a 3rd/4th degree laceration.

TARGET AUDIENCE:
This course is specifically designed for obstetricians, maternal fetal medicine physicians, family practitioners who deliver babies, nurse-midwives and licensed midwives, OR nurses, residents and fellows.

AGENDA:
FRIDAY, MAY 20 / SEPTEMBER 16
7:00am Registration/Breakfast/Change into Scrubs
8:00am Welcome and Introductions
Shelby Huston-McMill, MD
PEDIATRIC REGIONAL EMERGENCIES
8:30am Station 1
10:00am Break
10:15am Station 2
11:45am Lunch
12:45pm Station 3
2:30pm Break
2:30pm Station 4
4:00pm Station 5
5:30pm Adjourn for the Day

SATURDAY, MAY 21 / SEPTEMBER 17
7:00am Registration/Breakfast/Change into Scrubs
8:00am Station 1: Task Training session
9:00am Station 2: Task Training session
10:00am Station 3: Task Training session
11:00am Lunch
12:00pm Station 4: Task Training session
1:00pm Post-test
1:00pm Wrap Up/Adjourn

If you have activity questions or a complaint or concerns, please contact cpd-support@health.usf.edu
or call (813) 224-7860.

2. Apply evidence-based, best practice guidelines for the use of forces and vacuum assistance in performing a vaginal delivery.
3. Perform the technical maneuvers associated with a vaginal birth.
4. List the indications for and demonstrate the correct placement of a Bakri balloon and uterine compression sutures.
5. Using role-playing scenarios, demonstrate delivering bad news to a patient and her family.

The information provided at this CME/CE activity is for continuing education purposes only and is not meant to substitute for the independent medical/clinical judgment of a healthcare provider relative to diagnostic and treatment options for a specific patient’s medical condition.
TARGET AUDIENCE: This course is specifically designed for obstetricians, maternal fetal medicine physicians, family practitioners who deliver babies, nurse-midwives and licensed midwives, OB nurses, residents and fellows.

PHYSICIAN LEARNING OBJECTIVES: At the conclusion of the course, physicians will be able to:

1. Demonstrate essential teamwork principles for optimal management of obstetric emergencies: Shoulder dystocia, postpartum hemorrhage, eclamptic seizure, magnesium toxicity and maternal code.
2. Apply evidence-based, best practice guidelines for the use of forceps and vacuum during a shoulder dystocia delivery.
3. Perform the technical maneuvers associated with a vaginal breech delivery.
4. List the indications for and demonstrate the correct placement of a Bakri balloon and uterine compression sutures.
5. Using all available resources needed in the provision of high-risk patient care.
6. Diagnose and demonstrate the correct technique necessary to repair a 3rd/4th degree laceration.

NURSING LEARNING OBJECTIVES: At the conclusion of the course, nurses will be able to:

1. Demonstrate essential teamwork principles for optimal management of obstetric emergencies: Shoulder dystocia, postpartum hemorrhage, eclamptic seizure/magnesium toxicity and maternal code.
2. Diagnose and declare an emergency without delay.
3. Demonstrate responsibility and initiative in the scope of nursing practice.
4. Demonstrate crisis management skills, including: situational awareness, problem-solving and decision-making in critical situations.
5. Locate all available resources needed in the provision of high-risk patient care.
6. Use policies and procedures for the provision of a safe, efficient and effective healthcare delivery.

AGENDA:

FRIDAY, MAY 20 / SEPTEMBER 16
7:00am Registration/Breakfast/Change into Scrubs

TARGET AUDIENCE: This course is specifically designed for obstetricians, maternal fetal medicine physicians, family practitioners who deliver babies, nurse-midwives and licensed midwives, OB nurses, residents and fellows.

PHYSICIAN LEARNING OBJECTIVES:
1. Demonstrate essential teamwork principles for optimal management of obstetrical emergencies. Should dystocia, postpartum hemorrhage, eclampsia, seizure/magnesium toxicity and maternal code
2. Apply evidence-based, best practice guidelines for the use of forceps and vacuum during a shoulder dystocia delivery.
3. Demonstrate the correct placement of a Bakri balloon associated with a vaginal breech delivery.
4. Explicitly document the essential parts of role playing scenarios, demonstrate and practice techniques.
5. Identify all available resources needed in the provision of high risk patient care.
6. Diagnose and demonstrate the correct technique necessary to repair a 3rd/4th degree laceration.
7. Perform the correct sequence of maneuvers during a shoulder dystocia delivery.

NURSING LEARNING OBJECTIVES:
1. Demonstrate essential teamwork principles for optimal management of obstetrical emergencies. Should dystocia, postpartum hemorrhage, eclampsia, seizure/magnesium toxicity and maternal code.
2. Advise and declare an emergency without delay.
3. Demonstrate responsibility and initiative in the scope of nursing practice.
4. Demonstrate crisis management skills, including situational awareness, problem-solving and decision-making in critical situations.
5. Identify all available resources needed in the provision of high risk patient care.
6. Diagnose and display the correct technique necessary to repair a third or fourth degree laceration.

LOCATION: CAMLS (Center for Advanced Medical Learning and Simulation) 124 N. Tampa Street Tampa, FL 33602 (813) 224-7860 (www.camls-us.org)

CAMLS: Embarking on a build initiative to improve healthcare delivery through the most advanced tools.

ACCOMMODATIONS: Hilton Downtown Tampa 333 S. Franklin St, Tampa, Florida, 33602-3000 Phone: (813) 224-1000

The Hilton Downtown Tampa is centrally located, only 3 blocks from CAMLS and in close proximity to several restaurants, museums and parks.
