PROGRAM OVERVIEW
A panel of national and international experts will present the most recent, cutting edge information on different topics regarding antithrombotic therapy. The focus will be on advanced knowledge in basic sciences, clinical advances, controversies, and clinical pearls and application of antithrombotic therapy. Space is limited, early registration is encouraged.

TARGET AUDIENCE
Physicians in Primary Care, Internal Medicine, Family Practice, Hematology, Pulmonary Medicine and Cardiology, Nurses, Pharmacists, PA-C and other health care professionals caring for anticoagulation patients.

EDUCATIONAL OBJECTIVES
After participating in this knowledge- and application-based conference, attendees will:

• Describe the scope and methods of the ASH VTE guidelines
• Discuss recently published evidence that may change clinical practice related to anticoagulation therapy
• List anticoagulant options for the treatment of cancer associated VTE
• Recognize the role of very low dose DOAC in prevention of vascular disease
• Explain the basis for having a PE Response Team (PERT)
• Identify drug-drug interactions with DOACs
• List ways to apply quality improvement techniques in your anticoagulation management clinics
• Based on presented cases, apply antithrombotic therapeutic modalities to real-life scenarios
